JOURNAL OF THE

AUDIO ENGINEERING SOCIETY

SUBJECT AND AUTHOR INDEX

VOLUME 19-1971 NUMBERS 1-11

DECEMBER 1971, VOLUME 19, NUMBER 11

SUBJECT INDEX

Acoustics

Articulation Loss of Consonants as a Basis for the Design and Judgment of Sound Reinforcement Systems—W. Klein, No. 11, p. 920

Articulation Loss of Consonants as a Criterion for Speech Transmission in a Room—V.M.A. Peutz, No. 11, p. 915

Comments on "Sound the Destroyer" (L)—Ronald Slusser, No. 9, p. 792

Impulse Measurement Techniques for Quality Determination in Hi-Fi Equipment, with Special Emphasis on Loudspeakers—Alfred Schaumberger, No. 2, p. 101

Innovations in Studio Design and Recording in the Victor Record Studios—Y. Shiraishi, K. Okomura, and M. Fujimoto, No. 5, p. 405

Masking Noise Systems in Open and Closed Spaces—Ranger Farrell, No. 3, p. 197

On the Acoustics of Multitrack Recording Studios—Michael Rettinger, No. 8, p. 651

Problems of Sound Reinforcement in Large Halls (PN)—C. P. Boner and C. R. Boner, No. 2, p. 138

Sound System Design for St. Mary's Cathedral, San Francisco—Charles J. Catania, No. 9, p. 752

Stethoscope Acoustics: Current Investigative and Clinical Status—Paul Y. Ertel, No. 8, p. 683

Stethoscope Acoustics and the Engineer: Concepts and Problems—Paul Y. Ertel, Merle Lawrence, and Wonjin Song, No. 3, p. 182

AES Conventions

Convention in Koln—No. 4, p. 320

Fortieth Convention Report—No. 5, p. 430

Comments on the "Fortieth Convention" (L)—Stephen H. Lampen, No. 5, p. 446

Forty-first Convention—No. 10, p. 866

Audio Circuits

Active and Passive Filters as Loudspeaker Crossover Networks—J. Robert Ashley and Allan L. Kaminsky, No. 6, p. 494

Active-Network Realization of a 97-Channel Audio Filter Bank—Victor W. Bolie, Harold T. Fristoe, and James E. Baker, No. 3, p. 187

Application of Electronic Circuit Analogies to Loudspeaker Design Problems—Bart N. Locanthi, No. 9, p. 778

Attenuation Pads (PN)—Charles W. King, No. 4, p. 310

An Audio Delay System Using Digital Technology—Barry Blesser and Francis F. Lee, No. 5, p. 393

Constant-Voltage Crossover Network Design—Richard H. Small, No. 1, p. 12

Design of a Noise Eliminator System—Richard S. Burwen, No. 11, p. 906

Digital Tone Synthesis—Ralph W. Burhans, No. 8, p. 660

A Dynamic Noise Filter—Richard S. Burwen, No. 2, p. 115

Electrical Design and Musical Applications of an Unconditionally Stable Combination Voltage Controlled Filter/Resonator—Dennis P. Colin, No. 11, p. 923

Electronic Crossover Networks and Their Contribution to Improved Loudspeaker Transient Response—Allan P. Smith, No. 8, p. 674

An Electronically Generated Complex Microtonal System of Horizontal and Vertical Tonality—David S. Goldsmith, No. 10, p. 851

Low Power Drain Instrument Preamplifier (PN)—Robert F. Downs, No. 9, p. 786

New Techniques for Electronic Organ Tone Generation—Richard A. Schaefer, No. 7, p. 570

Notes on Panpots (PN)—Robert Orban, No. 11, p. 936

Operational Amplifier Implementation of Ideal Electronic Crossover Networks—J. Robert Ashley and Lawrence M. Henne, No. 1, p. 7

Production of Harmonics and Distortion in p–n Junctions—Richard A. Schaefer, No. 9, p. 759

Simplified Educational Music Synthesizer—Ralph W. Burhans, No. 2, p. 127

Single-Bus Keyboard Control for Digital Musical Instruments (PN)—Ralph W. Burhans, No. 10, p. 865

A Time-Shared Hybrid Sound Synthesizer—David Friend, No. 11, p. 928

Audio Measuring Equipment & Techniques

Analysis of Crosstalk on Stereo Test Records—Bernhard W. Jakobs, No. 4, p. 280

The Application of Impulse Measurement Techniques to the Detection of Linear Distortion—Alfred Schaumberger, No. 8, p. 664

Determination of Loudspeaker Signal Arrival Times: Part I—Richard C. Heyser, No. 9, p. 734

Determination of Loudspeaker Signal Arrival Times: Part II—Richard C. Heyser, No. 10, p. 829

Determination of Loudspeaker Signal Arrival Times: Part III—Richard C. Heyser, No. 11, p. 902

Discrete Field Equalization for Sound Reinforcement Systems—Daniel Queen, No. 1, p. 32

Impulse Measurement Techniques for Quality Determination in Hi-Fi Equipment, with Special Emphasis on Loudspeakers—Alfred Schaumberger, No. 2, p. 101

Plain and Fancy Test Signals for Music Reproduction Systems—Thomas A. Saponas, Randolph C. Matson, and J. Robert Ashley, No. 4, p. 294

Bioengineering

Audio and Medicine: A Collaboration Between Professions (Editorial)—Paul Y. Ertel and Philip Kantrowitz, No. 3, p. 244

Audio in Medicine: The Electronics of Nervous Transmission—Marvin D. Weiss, No. 1, p. 27

Better Amplifying Prostheses for the Hearing Handicapped (L)—Anne Harrison, No. 4, p. 316

The Bioengineer: Fact of Life in Today's Hospital (Editorial)—Paul Y. Ertel and Philip Kantrowitz, No. 4, p. 366

Comments on "Sound the Destroyer" (L)—Ronald Slusser, No. 9, p. 792

Development of An Intracranial Pressure Transducer—Lauchlan McKay, No. 2, p. 121

The Effect of Sound on Plant Growth—Paul E. Newton, No. 3, p. 202

Encephalophone: An Electronic Stethoscope for the Brain (PN)—Horace T. Castillo and Ira Sherwin, No. 2, p. 142

The Role of the Audio Engineer in Medicine (Editorial)—Dean A. DeMarre, No. 10, p. 899

Sensory Substitution Systems Using the Skin for the Input to the Brain (PN)—Paul Bach-y-Rita and Carter C. Collins, No. 5, p. 427

Signature Analysis of Heart Sounds and Murmurs—Benedict Kingsley, No. 4, p. 288

Stethoscope Acoustics: Current Investigative and Clinical Status—Paul Y. Ertel, No. 8, p. 683

Stethoscope Acoustics and the Engineer: Concepts and Problems—Paul Y. Ertel, Merle Lawrence, and Wonjin Song, No. 3, p. 182

Ultrasound in Retinal Detachment Surgery—David B. Karlin, No. 1, p. 20

Broadcasting

A Sound Augmentation System—Donald C. McCroskey, No. 9, p. 769

Two Portable Reproducing Consoles for Sound-Effect Operations (PN)—John R. Gable, Jr., No. 7, p. 594

Disc Recording and Reproduction

Analysis of Crosstalk on Stereo Test Records—Bernhard W. Jakobs, No. 4, p. 280

Comments on "Biradial and Spherical Stylus Performance in a Broadcast Disc Reproducer" (L)—D. A. Barlow, No. 2, p. 145

Reply to "Comments on 'Biradial and Spherical Stylus Performance in a Broadcast Disc Reproducer'" (L)—J. R. Sank, No. 2, p. 146

Comments on "The Diamond as an Industrial Material, With Special Reference to Phono Styli" (L)—Paul W. Klipsch, No. 9, p. 792

A Compatible Stereo-Quadraphonic (SQ) Record System—Benjamin B. Bauer, Daniel W. Gravereaux, and Arthur J. Gust, No. 8, p. 638

Comments on "A Compatible Stereo-Quadraphonic (SQ) Record System" (L)—James B. Cunningham, No. 11, p. 942

Reply to "Comments on 'A Compatible Stereo-Quadraphonic (SQ) Record System'" (L)—Benjamin B. Bauer, No. 11, p. 942

Development and Application of a New Tracing Simulator—Dieter Braschoss, No. 2, p. 108

A Discrete Four-Channel Disc and Its Reproducing System (CD-4 System)—T. Inoue, N. Takahashi, and I. Owaki—No. 7, p. 576

Groove Echo in Lacquer Masters—Daniel W. Gravereaux and Benjamin B. Bauer, No. 10, p. 847

A Linear Theory of Phonograph Playback—James V. White, No. 2, p. 94

Multichannel Stereo Matrix Systems: An Overview—John M. Eargle, No. 7, p. 552

A New Profile for LP Records—Warren Rex Isom, No. 7, p. 590

Notes on Pickup Design and Response (L)—D. A. Barlow, No. 3, p. 222

Suggested Performance Requirements for Compatible Four-Channel Recording—Peter Scheiber, No. 8, p. 647

Editorial

As Membership Grows, So Does the Journal (Editorial)—R. O. Fehr, No. 1, p. 74

Audio and Medicine: A Collaboration Between Professionals (Editorial)—Paul Y. Ertel and Philip Kantrowitz, No. 3, p. 244

The Bioengineer: Fact of Life in Today's Hospital (Editorial)—Paul Y. Ertel and Philip Kantrowitz, No. 4, p. 366

The Role of the Audio Engineer in Medicine (Editorial)—Dean A. DeMarre, No. 10, p. 899

Electronic Music and Sound Synthesis

Compositional Limitations of Electronic Music Synthesizers—Hubert S. Howe, Jr., No. 6, p. 484

Digital Tone Synthesis—Ralph W. Burhans, No. 8, p. 660

Electrical Design and Musical Applications of an Unconditionally Stable Combination Voltage Controlled Filter/Resonator—Dennis P. Colin, No. 11, p. 923

An Electronically Generated Complex Microtonal System of Horizontal and Vertical Tonality—David S. Goldsmith, No. 10, p. 851

The Moog at the Guggenheim (PN)—David L. Klepper, No. 1, p. 52

New Techniques for Electronic Organ Tone Generation—Richard A. Schaefer, No. 7, p. 570

Simplified Educational Music Synthesizer—Ralph W. Burhans, No. 2, p. 127

The Simulation of Moving Sound Sources—John M. Chowning, No. 1, p. 2

Single-Bus Keyboard Control for Digital Musical Instruments (PN)—Ralph W. Burhans, No. 10, p. 865

Synthesizing Musical Sounds by Solving the Wave Equation for Vibrating Objects: Part I—Lejaren Hiller and Pierre Ruiz, No. 6, p. 462

Synthesizing Musical Sounds by Solving the Wave Equation for Vibrating Objects: Part II—Lejaren Hiller and Pierre Ruiz, No. 7, p. 542

A Time-Shared Hybrid Sound Synthesizer—David Friend, No. 11, p. 928

Four-Channel Recording

Analysing Phase-Amplitude Matrices—Peter Scheiber, No. 10, p. 835

A Compatible Stereo-Quadraphonic (SQ) Record System—Benjamin B. Bauer, Daniel W. Gravereaux, and Arthur J. Gust, No. 8, p. 638

Comments on "A Compatible Stereo-Quadraphonic (SQ) Record System" (L)—James B. Cunningham, No. 11, p. 942

Reply to "Comments on 'A Compatible Stereo-Quadraphonic (SQ) Record System'" (L)—Benjamin B. Bauer, No. 11, p. 942

Directional Ambiguity of Quadruphonic Matrices (L)—Benjamin B. Bauer, No. 4, p. 315

A Discrete Four-Channel Disc and Its Reproducing System (CD-4 System)—T. Inoue, N. Takahashi, and I. Owaki, No. 7, p. 576

Four Channels and Compatibility—Peter Scheiber, No. 4, p. 267

Multichannel Stereo Matrix Systems: An Overview—John M. Eargle, No. 7, p. 552

Musicassette Quadrasonic: Tape Record Compatibility—E. R. Hanson, No. 1, p. 24

On the Processing of Two- and Three-Channel Program Material for Four-Channel Playback—John M. Eargle, No. 4, p. 262

Subjective Assessment of Multichannel Reproduction—Takeshi Nakayama, Tanetoshi Miura, Osamu Kosaka, Michio Okamoto and Takeo Shiga, No. 9, p. 744

Suggested Performance Requirements for Compatible Four-Channel Recording—Peter Scheiber, No. 8, p. 647

Loudspeakers & Earphones

Active and Passive Filters as Loudspeaker Crossover Networks—J. Robert Ashley and Allan L. Kaminsky, No. 6, p. 494

Application of Electronic Circuit Analogies to Loudspeaker Design Problems—Bart N. Locanthi, No. 9, p. 778

The Application of Impulse Measurement Techniques to the Detection of Linear Distortion—Alfred Schaumberger, No. 8, p. 664

Comments on "Resonance Frequencies to Measure Speaker-to-Enclosure Compliance Ratio" (PN)—J. Robert Ashley, No. 1, p. 55

Comments on "Wisdom and Witchcraft" (L)—Warner Clements, No. 1, p. 58

Reply to "Comments on 'Wisdom and Witchcraft'" (L)—J. Robert Ashley, No. 1, p. 58

Constant-Voltage Crossover Network Design—Richard H. Small, No. 1, p. 12

Crossover Networks and Modulation Distortion (PN)—Richard H. Small, No. 1, p. 55

Determination of Loudspeaker Signal Arrival Times: Part I—Richard C. Heyser, No. 9, p. 734

Determination of Loudspeaker Signal Arrival Times: Part II—Richard C. Heyser, No. 10, p. 829

Determination of Loudspeaker Signal Arrival Times: Part III—Richard C. Heyser, No. 11, p. 902

Efficiency Does Not Depend On Cone Area (PN)—J. Robert Ashley, No. 10, p. 863

Efficiency of Direct-Radiator Loudspeaker Systems (PN)—Richard H. Small, No. 10, p. 862

Electrical Versus Acoustical Parameters in the Design of Loudspeaker Crossover Networks (PN)—G. L. Augspurger, No. 6, p. 509

Electronic Crossover Networks and Their Contribution to Improved Loudspeaker Transient Response—Allan P. Smith, No. 8, p. 674

Horn-Loaded Electrostatic Loudspeaker—Josef Merhaut, No. 10, p. 840

Impulse Measurement Techniques for Quality Determination in Hi-Fi Equipment, with Special Emphasis on Loudspeakers—Alfred Schaumberger, No. 2, p. 101

Loudspeakers in Vented Boxes: Part I—A. N. Thiele, No. 5, p. 382

Loudspeakers in Vented Boxes: Part II—A. N. Thiele, No. 6, p. 471

Postscript to "Loudspeakers in Vented Boxes" (L)— J. Robert Ashley, No. 6, p. 516

A New Underwater Earphone—Louis A. Abbagnaro and Benjamin B. Bauer, No. 6, p. 489

A Note on Using Resonance Frequencies in a Test Box and in Free Air to Measure Speaker-to-Enclosure Compliance Ratio (PN)—Albert W. Cobb, No. 1, p. 53

Operational Amplifier Implementation of Ideal Electronic Crossover Networks—J. Robert Ashley and Lawrence M. Henne, No. 1, p. 7

Phase and Delay Distortion in Multiple-Driver Loudspeaker Systems (PN)—Richard H. Small, No. 1, p. 56

Providing Foldback with Out-of-Phase Loudspeakers—Edward S. Jones, No. 4, p. 306

Small Balanced Armature Receiver for Electronic Telephone Sets—Henning S. Madsen, No. 3, p. 209

Some Design Considerations for Electrostatic Headphones—John J. Bubbers, No. 3, p. 206

Sound Columns—Practical Design and Applications—L. H. Schaudinischky, A. Schwartz, and S. T. Mashiah, No. 1, p. 36

A Three-Way Columnar Loudspeaker for Reinforcement of the Performing Arts—Allan P. Smith, No. 3, p. 213

Comments on "A Three-Way Loudspeaker for the Reinforcement of the Performing Arts" (L)—Melvin C. Sprinkle, No. 8, p. 680

Reply to "Comments on 'A Three-Way Loudspeaker for the Reinforcement of the Performing Arts'" (L)—Allan P. Smith, No. 8, p. 682

Microphones

Closing the Wireless Versus Wired Microphone Dependability Gap—Barry M. Kaufman, No. 1, p. 46

Experimental Wide-Bandwidth Tooth-Contact Microphone—Austin J. Brouns, No. 1, p. 41

Microphone Accessory Shock Mount for Stand or Boom Use—Gerald W. Plice, No. 2, p. 133

Microphone Windscreens (PN)—John K. Hilliard, No. 5, p. 426

Miniature Headband-Mounted Dynamic Microphone for Professional Applications—Alan R. Watson, No. 7, p. 584

Sound Systems

Anti-High Futility for an Air-Conditioned Pickup Truck (PN)—J. Robert Ashley, No. 3, p. 220

The Application of Impulse Measurement Techniques to the Detection of Linear Distortion—Alfred Schaumberger, No. 8, p. 664

Articulation Loss of Consonants as a Basis for the Design and Judgment of Sound Reinforcement Systems—W. Klein, No. 11, p. 920

Design and Construction of a Stereophonic Amplifier-Loudspeaker Switching/Routing Facility for Use at the Conventions of the Audio Engineering Society (PN)—Thomas R. Haskett, No. 2, p. 140

Comments on "Design and Construction of a Stereophonic Amplifier-Loudspeaker Switching/Routing Facility for Use at the Conventions of the Audio Engineering Society (L)—J. E. Dupree, No. 5, p. 446

Reply to "Comments on 'Design and Construction of a Stereophonic Amplifier-Loudspeaker Switching/Routing Facility for Use at the Conventions of the Audio Engineering Society'" (L)—Thomas R. Haskett, No. 5, p. 446

Design of a High-Quality Public Address System for Aircraft Use—Allan J. Rosenheck and James D. Kronman, No. 5, p. 410

Discrete Field Equalization for Sound Reinforcement Systems—Daniel Queen, No. 1, p. 32

Impulse Measurement Techniques for Quality Determination in Hi-Fi Equipment, with Special Emphasis on Loudspeakers—Alfred Schaumberger, No. 2, p. 101

Masking Noise Systems in Open and Closed Spaces—Ranger Farrell, No. 3, p. 197

On the Acoustics of Multitrack Recording Studios—Michael Rettinger, No. 8, p. 651

Plain and Fancy Test Signals for Music Reproduction Systems—Thomas A. Saponas, Randolph C. Matson, and J. Robert Ashley, No. 4, p. 294

Problems of Sound Reinforcement in Large Halls (PN)—C. P. Boner and C. R. Boner, No. 2, p. 138

Providing Foldback with Out-of-Phase Loudspeakers—Edward S. Jones, No. 4, p. 306

A Sound Augmentation System—Donald C. McCroskey, No. 9, p. 769

Sound Columns—Practical Design and Applications—L. H. Schaudinischky, A. Schwartz, and S. T. Mashiah, No. 1, p. 36

Sound System Design for St. Mary's Cathedral, San Francisco—Charles J. Catania, No. 9, p. 752

A Sound System for Amphibious Assault Training—Allan P. Smith, No. 6, p. 503

A Three-Way Columnar Loudspeaker for Reinforcement of the Performing Arts—Allan P. Smith, No. 3, p. 213

Comments on "A Three-Way Loudspeaker for the Reinforcement of the Performing Arts" (L)—Melvin C. Sprinkle, No. 8, p. 680

Reply to "Comments on 'A Three-Way Loudspeaker for the Reinforcement of the Performing Arts'" (L)—Allan P. Smith, No. 8, p. 682

Transportable Sound Amplification for Disney On Parade—Albert A. Huff and William E. Blanton, No. 8, p. 669

Two Portable Reproducing Consoles for Sound-Effect Operations (PN)—John R. Gable, Jr., No. 7, p. 594

Speech & Hearing

Active-Network Realization of a 97-Channel Audio Filter Bank—Victor W. Bolie, Harold T. Fristoe, and James E. Baker, No. 3, p. 187

Articulation Loss of Consonants as a Basis for the Design and Judgment of Sound Reinforcement Systems—W. Klein, No. 11, p. 920

Articulation Loss of Consonants as a Criterion for Speech Transmission in a Room—V.M.A. Peutz, No. 11, p. 915

Better Amplifying Prostheses for the Hearing Handicapped (L)—Anne Harrison, No. 4, p. 316

Directional Ambiguity of Quadruphonic Matrices (L)—Benjamin B. Bauer, No. 4, p. 315

Factors Affecting Individual and Group Levels in Verbal Communication—Mark B. Gardner, No. 7, p. 560

Masking Noise Systems in Open and Closed Spaces—Ranger Farrell, No. 3, p. 197

Sensory Substitution Systems Using the Skin for the Input to the Brain (PN)—Paul Bach-y-Rita and Carter C. Collins, No. 5, p. 427

The Transitivity of Loudness Level—Sanford E. Gerber and Paul Milner, No. 8, p. 656

Standards

Decibel, A Unit of Level (L)—Robert W. Young, No. 6, p. 512

IEC Standardization Work (L)—Herman A. O. Wilms, No. 11, p. 942

Resonance versus Resonant (L)—F. V. Hunt, No. 9, p. 792

Weighted Peak Flutter Measurement—A Summary of the New IEEE Standard—J. G. McKnight, No. 10, p. 859

What's a watt (rms)? (L)—J. Robert Ashley, No. 9, p. 793

Tape Recording & Reproduction

Audio Cassette Chromium Dioxide Tape—Klaus E. Naumann and Eric D. Daniel, No. 10, p. 822

Corrigendum—Tape Flux Measurement Theory and Verification (L)—J. G. McKnight, No. 2, p. 146

Musicassette Interchangeability: The Facts Behind the Facts—E. R. Hanson, No. 5, p. 417

Musicassette Quadrasonic: Tape Record Compatibility—E. R. Hanson, No. 1, p. 24

Selected Abstracts from Conference of the New York Academy of Sciences on Advances in Magnetic Recording (PN)—No. 3, p. 221

A Simplified Hysteresis-Loop Model of the AC-Biased Magnetic Recording Process—Zoltan Vajda, No. 5, p. 398

Theoretical Influences Caused by Geometrical Errors in Magnetic Tapes and Recording Heads—Reginald Morris, No. 11, p. 912

3rd Conference on Magnetic Recording of the Hungarian Optical, Acoustical and Film Technical Society: Part I—No. 7, p. 610

3rd Conference on Magnetic Recording of the Hungarian Optical, Acoustical and Film Technical Society: Part II—No. 8, p. 690

A Visual Display of Tape Modulation Noise with Audio Recording (PN)—Jan Melis, No. 11, p. 939
